Summary

Full Stack Developer with a proven track record of building production-grade AI workflows, healthcare e-commerce, and SaaS platforms for international clients. Expert in the Next.js/Node.js/PostgreSQL stack with deep experience in AI tool integration (Google Sheets CRUD, NLP), security (PII Vault, AES-256), and enterprise-scale features (i18n, RBAC). Highly skilled in remote collaboration and delivering end-to-end features in fast-paced environments.

Technical Skills

- **Languages:** JavaScript (ES6+), TypeScript, SQL (PostgreSQL), HTML5, CSS3
- **Frontend:** Next.js, React.js, TailwindCSS, Redux, Material-UI, i18n Localization
- **Backend:** Node.js, Express.js, NestJS, MedusaJS, REST & GraphQL APIs, Supabase
- **Cloud & DevOps:** AWS (S3, Elastic Beanstalk), Docker, Vercel, Railway, Firebase, Git
- **Tools & Security:** JWT, OAuth 2.0, AES-256 Encryption, PII Masking, JIRA, Postman

Professional Experience

Full Stack Developer — Prahan Soft Pvt Ltd — Remote **Jul 2025 – Apr 2026**

- **AI Workflow (Omni Agent):** Engineered a Google Sheets AI connector enabling AI agents to perform full CRUD operations via OAuth2; designed a "Global Search" architecture for sub-second resource retrieval.
- **Security Framework:** Implemented a PII (Personally Identifiable Information) masking utility and AES-256-CBC "Vault" strategy to ensure data privacy and HIPAA/GDPR compliance.
- **Healthcare E-commerce (Nova):** Architected end-to-end notification systems and tax region pricing logic for a US-based health platform using MedusaJS and Next.js.
- **Article Review Platform (Gloled):** Served as the Lead Developer, building the entire codebase from scratch; implemented AI-driven article evaluation, sector-based filtering, and Docker-based deployment.
- **Process Improvement:** Resolved 40+ critical production bugs in a single month; optimized API efficiency by identifying and eliminating silent infinite loops in frontend-backend communication.

Full Stack Engineer (Freelance) — Bright Academy **Apr 2026 – Present**

- Architecting a professional Learning Management System (LMS) using Next.js 16 and Supabase.
- Implementing security features including dynamic watermarking and server-side signed URLs to prevent unauthorized content distribution.

MERN Stack Developer (Internship) — Brototype — Kerala **Feb 2024 – Jul 2025**

- Completed intensive project-based training with weekly assessments by industry CTOs and Senior Engineers.
- Developed a full-featured E-commerce platform from Figma design to AWS deployment, integrating Razorpay and AWS S3 for scalable asset storage.
- Built and deployed several production clones (Netflix, OLX) focusing on Redux state management and responsive UI/UX.

Key Projects

ChatFlow - AI Chat Application — Demo — GitHub **MERN, TypeScript, Socket.io**

- Built a real-time chat platform with AI smart replies and message summarization using Hugging Face NLP.
- Implemented WebSocket communication with optimized data structures for low-latency file sharing.

Aura Candle Studio - E-commerce — Demo — GitHub **Node.js, AWS, Razorpay**

- Developed a full-stack e-commerce site with payment gateway integration and inventory management.
- Managed scalable asset storage using AWS S3 and deployed via automated CI/CD on Elastic Beanstalk.

Professional Activities

Technical Interviewer (Contract) — DataValley	Nov 2025 – Dec 2025
Evaluated 6+ senior-level candidates on Node.js, System Design, and DSA; improved screening efficiency by 25%.	
Communication Trainer (Part-time) — Brototype	Jul 2024 – Jul 2025
Mentored 30+ developers in technical communication and interview prep for international markets.	

Education & Certifications

B.S. Computer Science — University of the People (GPA: 3.80)	Jun 2024 – Present
Certifications: Harvard CS50x, FreeCodeCamp JS Algorithms, MS Azure (AZ-900), IBM AI Fundamentals
